

SEEEDED

Genre: Sci Fi Action/Thriller

Logline: When an Archaeologist discovers an ancient human healing strand of DNA within an alien artifact, he becomes the world's "Most Wanted"... preferably dead.

Archie never intended to become immortal today... but he did.

He found an ancient artifact and the test results throw the World Wide Health Organization into a panic as all of mankind could become immortal. Now his geneticist friend, Tyra is on the run with him and the church is desperate to quarantine them.

The Vatican's ancient scrolls warn that this artifact's enlightenment of the population would be the death of religion. .

Archie unwittingly puts the artifact within his old COO army nemesis Wilder Dickens' reach at the Vandenberg AFB, NASA division. But Dickens is disappointed when he only gets to torch Archie's partner.

Tyra is shot, their car is forced over a cliff, and then Archie has to take out an assassin before he finds his partner alive and healing. He has to rush Tyra to the tiny sample that has now taken over the clearing before she dies.

But there is no DNA there for Archie.

Even worse, Dickens has taken his resurrected partner, now Archie has to sneak into Vandenberg, find his partner, the artifact, his DNA strand and get them all out alive.

Instead, he finds himself in single combat with Dickens, and this time... immortality is the prize.

"SEEEDED" is a race to control the future of mankind with the choice or not on who gets the advanced DNA.
